

FROM THE DESK OF DR. AL OLSZEWSKI
A SPECIAL REQUEST

Thank you for taking a minute to read this. As you know the energy futures of America and Montana are under attack by environmental NGO's. They are in the courts forcing the Montana Dept of Environmental Quality to include climate change in their decision, regardless of the facts.

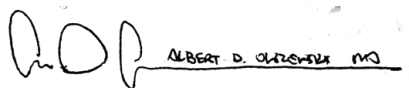

They have also taken the MT Public Service Commission to court to force energy contracts to change from "Affordable and Reliable" energy to "Green and Greener". Now they want the Montana Consumer Council to include the "social costs" of climate change in their presentations to the PSC and administrative agencies. This of course will build a record liberal courts can rule on.

On the federal side, you are aware of the EPA effort to close Colstrip by mandating the use of technology that does not yet exist. But are you aware that the Federal Energy Regulatory Commission passed Rule 1920, shifting the cost of building transmission lines connecting renewable energy projects in Blue States to rate payers in Red States?

In the race for control of the MT PSC, only one person has the background, knowledge, and courage to stand up for Montana's employers and families. Brad Molnar is that person, and he pledges to unite red State Commissioners to fight back against federal overreach and liberal policies.

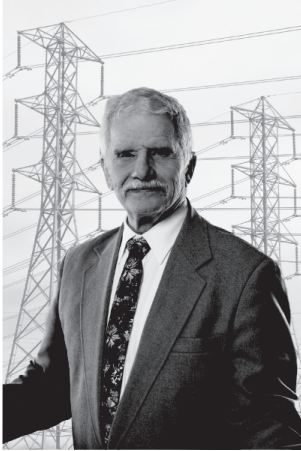

Brad's biography is on the following page. He is coming under constant attack and needs our help. Please consider a timely donation to his campaign. I have worked with him on several issues. He is an honorable and capable man.

Sincerely,

ALBERT D. OLSZEWSKI MD

Dr. Al Olszewski, Chairman, Flathead Republicans.

Biography of Brad Molnar

- 1993 through 1999 served in the Montana House
- 2001 Energy Advisor to the House Speaker and Governor Martz
- 2001 crafted HB 640 to stop the onslaught of deregulation saving Montanan's employers and family's millions of dollars.
- 2004 thru 2012 served on the Montana Public Service Commission – Twice as Vice Chair
- Current serving in the Montana Senate 2020 / 2024

A Plea from Brad Molnar

Firstly, thank you Dr. Al for trusting me with your good name. Dr. Al understands the depth of our challenges. The Biden/Harris administration and Montana's environmental NGO's are trying, with some success, to control Montana's energy future. They realize that if they control our energy they control literally everything. That is why the Mt. PSC Vice President is being out fund raised 59/1 in her bid for re-election. Yes, 59 to 1. My fate will be no different as the environmental industry financially supports those that support them.

In my case, the environmental NGO's will launch their own third-party ad campaigns in support of my opponent, Susan Bilo, an environmental sustainability professor in Bozeman. Without your support I will not be able to respond to the half dozen newly minted PAC's, so we will just have to stand empty handed, and hope.

Or you can send what you can. I will spend it in an accurate, respectful, and fact filled campaign protecting us from a "woke" PSC.

Thank you so much,

Brad Molnar
