2

Sex
An objective, binary
classification

3

Are we “sexual”
beings
or “sexed” beings?

4

What about intersex?
***Anomalies do not
nullify categories***

5

Gender
(modern definition)
subjective self-perception
of being male or female

6

Our culture now values
altering the objective, physical
reality of our bodies to
accommodate the subjective
impression of ourselves

7

Norms

Masculinity and femininity are
behavioral characteristics
associated with being male or
female (often cultural)

8

Callings

Manhood and womanhood,
biblical distinctions of
being equal and distinct

9

God intends for the
woman to complement
and not duplicate the man

10

So God created man in his own
image,
in the image of God he created
him;
male and female he created
them.

11

Sex is first and foremost a
spiritual and ontological reality
created by God

Psychology usurps biology;
what I feel becomes who I am

12

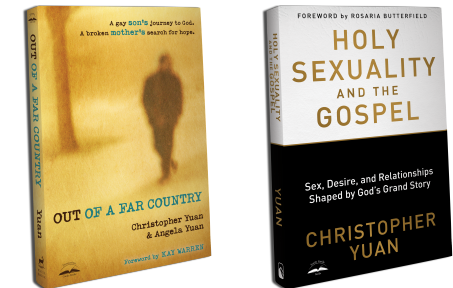

Transgenderism is not exclusively a
battle for what is male and female, but
rather a battle for what's true and real

Sola experientia ("experience
alone") has won out over *sola*
Scriptura ("Scripture alone")

13

We cannot properly
understand gender identity
without beginning with
theological anthropology—
we're created in the image of
God and we're also fallen
